

Buy American Mention of the Week

Stay active and motivated with sport & fitness accessories

By Roger Simmermaker

January 23, 2014

If you're the type of person that has a passion for fitness or sports - or if you simply like to stay active - and you like to listen to music on your mp3 or smartphone while doing it, you'll want to take a look at four new American-made products in the [USA Shop](#) by American-owned Topcor that are sure to help keep you motivated.

1. If you like to go jogging or walking for exercise like me, try Topcor's [Sport Armband](#), which allows your phone or mp3 to be easily attached to your arm for that morning or evening walk or jog.
2. If cycling is your activity of choice, try Topcor's [Bike Mount](#), which instantly installs without tools (and won't compromise the paint on your bike).
3. Topcor's [Handband](#) fits in your palm or on your belt to keep your music source close and handy.
4. And if you simply want to make it easier to keep your phone and wallet together (since we all take both of them with us wherever we go anyway) check out Topcor's [Tech Wallet](#). I just received mine in the mail the other day!

Another great thing about all of the above American-made products is that they all allow you to carry cash and credit cards with you while you're on the go. And no, they won't fall out, and your phone or mp3 won't fall off while you're jogging or cycling, either. Just check out the paint-shaker video on Topcor's website at www.walletforphone.com and you'll be convinced!

Also at www.walletforphone.com, you'll be able to see videos on all four American-made products that should answer any questions you might have about all of the features and how they all work to make your favorite sport or activity more enjoyable.

Topcor is an American company based in Irvine, California, whose principal designer shares a passion for fitness and sports like many other Americans. With over 20 years of design experience under their belt, Topcor's designers have simply developed smart solutions that allow phones and mp3s to be a functional part of any activity instead of an impediment.

Here are a few more things you might want to know about the four new "Made in USA" products in the [USA Shop](#):

1. The fasteners for your Armband, Bike Mount, etc., will outlast any device you own (unless you apply and remove your device over ten thousand times).
2. Your new American-made music companion will cost you less when ordered from the [USA Shop](#) than anywhere else.
3. The catch (you knew there had to be one, right?): the fastening systems won't work on rubber cases.

The [USA Shop](#) prices for these American-made devices are very reasonable. The [Tech Wallet](#) is just \$14.95 (compare at \$19.99); the [Sport Armband](#) and [Bike Mount](#) and both \$19.95 (compare at \$24.99); and the [Handband](#) is just \$9.95 (compare at \$14.99).

And here's another important use for any or all of the Topcor products: If you're like me and you made one of those New Year's resolutions to get a little slimmer in 2014, they will help you stay motivated to stay on track. I know, because it's working for me!

So visit the [USA Shop](#) and check out these American-made products so we can help keep American workers active at their jobs by buying American-made products while your favorite Topcor companion helps to keep you active doing whatever you like to do. No matter which product you choose, you'll be helping American workers, the American economy, and you'll also be helping yourself.
